

**St. Andrew's College Course Outline
Business Studies Department**

**Business Leadership: Management Fundamentals
Grade 12, University/College Preparation
BOH4M**

Credit value:	1.0
Prerequisite course(s):	None
Corequisite course(s):	None
Resources:	Course information is compiled from a variety of texts: John Schermerhorn Jr. and Barry Wright, <i>Management Fundamentals: Canadian Edition</i>. John Wiley & Sons Canada, Ltd, 2007. ISBN: 9780470838440. Anton Shone and Bryn Parry, <i>Successful Event Management, 2nd Edition</i>. South-Western Cengage Learning, 2004. ISBN: 9781844800766. Lori Cranson and Madeline Dennis, <i>Entrepreneurship: Creating a Venture, 2nd Edition</i>. Nelson Thomson Canada Ltd, 2001. ISBN: 0176201432. David Notman and Jack Wilson, <i>The World of Marketing: A Canadian Perspective</i>. Nelson Thomson Canada Ltd, 2003. ISBN: 0176259465. Jerry Solomon, <i>Managing Sporting Events</i>. Human Kinetics, 2002. ISBN: 0763031081. Walter S. Good, <i>Building A Dream</i>. McGraw-Hill Ryerson, 2000. ISBN: 0075607697.
Curriculum policy:	Ontario Schools, Kindergarten to Grade 12 Policy and Program Requirements, 2016 The Ontario Curriculum, Grades 11 and 12 Business Studies, 2006 (Revised)

	Growing Success: Assessment, Evaluation, and Reporting in Ontario Schools, First Edition, Covering Grades 1 to 12, 2010
Department Head:	Mr. S. Ludwig
Developed by:	Mr. S. Ludwig (August 2009)
Revised by:	Mr. S. Ludwig (June 2025)

Course description/rationale:	
This course focuses on the development of leadership skills used in managing a successful business. Students will analyse the role of a leader in business, with a focus on decision making, management of group dynamics, workplace stress and conflict, motivation of employees, and planning. Effective business communication skills, ethics, and social responsibility are also emphasized. The business leadership courses allow students to explore how managers function in organizations and take on the challenge of generating solutions in order to solve problems. These courses allow students to explore the roles, responsibilities, skills, and functions of management. Students will learn the factors that encourage effective leadership practices. Emphasis throughout the courses will be placed on the importance of ethics and social responsibility in the corporate world. Students will learn how to communicate effectively for business purposes. The courses in business leadership will prepare students to work effectively in organizations in positions of employment and management.	
Overall curriculum expectations: By the end of this course, students will:	
<i>Leadership and Management Fundamentals</i>	<i>Foundations of Management</i> • assess the role of management within an organization • evaluate the impact of issues related to ethics and social responsibility on the management of organizations <i>Leading</i> • demonstrate an understanding of proper leadership techniques in a variety of situations
<i>Venture Planning and Management</i>	<i>Foundations of Management</i> • demonstrate the use of appropriate communication techniques related to business management • evaluate the impact of issues related to ethics and social responsibility on the management of organizations <i>Management Challenges</i> • demonstrate an understanding of the communication process within the workplace • evaluate the strategies used by individuals and organizations to manage stress and conflict
<i>International Management and Marketing</i>	<i>Foundations of Management</i> • demonstrate the use of appropriate communication techniques related to business management <i>Management Challenges</i> • demonstrate an understanding of the communication process within the workplace • compare theories of how to motivate individuals and teams in a productive work environment

	<i>Leading</i> • apply an understanding of human behaviour to explain how individuals and groups function in the workplace • demonstrate an understanding of group dynamics
<i>Event Management – Planning and Organizing</i>	<i>Leading</i> • demonstrate an understanding of proper leadership techniques in a variety of situations <i>Planning and Controlling</i> • analyse the importance of planning to the success of an organization • demonstrate an understanding of appropriate planning tools and techniques in a variety of situations • analyse the relationship between strategic planning and the success of an organization <i>Organizing</i> • demonstrate an understanding of the various organizational structures used to manage the workforce effectively
<i>Event Management – Implementation and Execution</i>	<i>Leading</i> • demonstrate an understanding of proper leadership techniques in a variety of situations <i>Planning and Controlling</i> • analyse how companies respond to internal and external pressures for change • assess the importance of control in management <i>Organizing</i> • assess the ways in which organizational structures have changed to adapt to the changing nature of work evaluate the role of human resources within an organization

Note – in addition to the above BOH4M curricular expectations, supplemental curricular expectations from other Business Studies courses are integrated into the course to provide a full scope of interdisciplinary, experiential education. These expectations build on the student learning achieved in the IDC3O course in Grade 11. The supplemental curricular expectations are as follows:

Ideas and Opportunities for New Ventures

- conduct primary and secondary marketing research to evaluate the idea or opportunity for their proposed venture

The Benefits of a Venture Plan

- assess the importance of having a venture plan
- analyse the structure and content of a venture plan
- explain how to evaluate and revise a venture plan

Developing and Completing a Venture Plan for the Proposed Business

- analyse the resources required to run their chosen venture
- complete the components of an effective production plan for their chosen venture
- complete the components of an effective marketing plan for their chosen venture
- complete the components of an effective financial plan for their chosen venture
- produce, using appropriate software, a venture plan for their chosen venture.

The Enterprising Experience: Planning and Organizing an Event

- generate and evaluate ideas for an event in the school or the community and identify a realistic event to plan and organize;
- analyse the resources required to plan the event;
- create an appropriate advertising and promotional plan for the event;
- demonstrate enterprising skills by participating in the planning and execution of the event.

Marketing Fundamentals

- demonstrate an understanding of the importance of marketing research to a business and how information technology can be used to obtain and analyse marketing-related information

Trends in Marketing

- summarize, on the basis of computer research, career pathways in marketing

Outline of the course content:

Unit Title	Content	Hours
Leadership and Management Fundamentals	Management Fundamentals, Leadership Techniques, Ethics and Social Responsibility	20
Venture Planning and Management	Business Communication, The Communication Process, Stress and Conflict Management	20
International Management and Marketing	Motivation, Leading, Human Behaviour, Leadership Techniques, Group Dynamics	20
Event Management – Planning and Organizing	The Importance of Planning, Planning Tools and Techniques, Strategic Planning, Organizational Structures	25
Event Management - Execution	Leadership Techniques, Controlling, The Management of Change, The Changing Nature of Work, Human Resources	25
Total:		110

Note – in addition to the above units of study, students are also provided a supplemental teaching unit on Career Planning which features post-secondary program research as well as career planning. This builds on the following expectations from the IDC3O prerequisite course:

Implementation, Evaluation, Impacts, and Consequences

- implement and communicate information about interdisciplinary endeavours, using a variety of methods and strategies
- evaluate the quality of interdisciplinary endeavours, using a variety of strategies
- analyse and describe the impact on society of interdisciplinary approaches and solutions to real-life situations
- analyse and describe ways in which interdisciplinary skills relate to personal development and careers

Teaching and learning strategies used in this course:

The strategies used are varied to meet the needs of students and the range of learning styles encountered. Teaching and learning strategies used in this course include the following:

Socratic Dialogue
Video Analysis
Debate
Role Playing
Media Analysis
Simulations
Cooperative Learning
Conferences

Response Journals
Problem Solving
Discovery Activity
Field Trips
Daybooks
Demonstrations
Textbook Use
Workshops

Homework
Presentations
Internet Search
Games
Current Events
Data Analysis
Seminars
Guest Speakers

Assessment and evaluation of student achievement:	
Assessing, evaluating, and reporting on the achievement of curriculum expectations and on the demonstration of learning skills and work habits is done separately, apart from when learning skills and work habits may be included as part of a curriculum expectation. All curriculum expectations are accounted for in instruction and assessment. Evidence of student achievement for assessment is collected over time from three different sources: observations, conversations, and student products.	
<i>Learning skills and work habits:</i>	The development, assessment, and evaluation of learning skills and work habits will occur in the following areas: responsibility, organization, independent work, collaboration, initiative, and self-regulation. Learning skills and work habits, apart from when learning skills and work habits may be included as part of a curriculum expectation, will not be considered in the determination of a student's grade.
<i>Categories of knowledge and skills; levels of achievement:</i>	Students will have numerous and varied opportunities to demonstrate the full extent of their achievement of the content standards (curriculum expectations) and performance standards (achievement chart) in a balanced manner across all four categories of knowledge and skills: knowledge and understanding, thinking, communication, and application. Four levels of achievement (levels 1-4) are identified on the achievement chart for Business Studies. Depending on the task or activity, students may receive marks, achievement levels, or comments.
<i>Assessment for/as learning:</i>	Assessment is the process of gathering information from a variety of sources that accurately reflects how well a student is achieving both specific and overall curriculum expectations in a course. As part of assessment, teachers and peers will provide students with descriptive feedback that guides their efforts towards improvement (assessment for learning) as well as guides them in assessing their own progress (assessment as learning).
<i>Assessment of learning:</i>	Evaluation is based on assessment of learning and focuses on students' achievement of the overall expectations. A single assessment of learning may include one or more of the four knowledge and skills categories. Assessment of learning in this course will be continuous throughout the year, will follow opportunities for students to improve their understanding, and will include a variety of assessment methods. Assessment of each student's learning is done independently and by the teacher.
<i>Strategies for assessment of student performance:</i>	Teachers of this course will work collaboratively with colleagues to regularly review course content, instructional strategies and assessment practices, and will make modifications to the program as needed to improve student achievement.

Sample Activity	Assessment Type/Assessor	Observation? Conversation? Student Product?	Assessment Tool
Work period assessment	AS learning	Observation Conversation	Rubric
Self/peer assessments	AS learning	Student Product	Rubric
Learning skills and essential case study problem solving skills	AS learning	Conversation and Student Product	Checklist, observation
Group activities	AS learning	Student Product, conversation and observation	Rubric, observation
Socratic dialogue and case study discussion	AS learning	Conversation and observation	Observation
Diagnostic assessments at the beginning of new concepts	AS learning	Student product, conversation, and observation	Observation, checklist
Completion/review of homework tasks	FOR learning	Student Product, conversation and observation	Checklist, observation
Worksheets	FOR learning	Student product	Marking scheme, checklist
Concept checks (i.e. quizzes)	FOR learning	Student product	Marking scheme
Current events reports	FOR learning	Student product	Marking scheme
Internet search activities	FOR learning	Student product	Checklist
Tests	OF learning	Student product	Marking scheme
Assignments	OF learning	Student product	Rubric
Summative Project	OF learning	Student product	Rubric
Final Written Exam	OF learning	Student product	Rubric

Reporting of student achievement – The final grade:

The percentage grade represents an evaluation of the students' overall achievement with regard to both the content standards identified by the curriculum expectations and the performance standards outlined in the achievement chart for Business Studies. The distribution of marks into a grade is based on the departmental assessment and evaluation policies for the course and will reflect the student's most consistent level of achievement where appropriate, with special consideration given to more recent evidence. Comments on the development of learning skills and work habits, along with general comments regarding student progress, will also be provided on reports. Evaluation from term opportunities for assessment of learning will comprise 70% of the overall grade for the course; the final summative evaluation (event planning and execution) and a final written examination in June, will comprise 30% of the overall grade and will reflect all categories of learning and skills.

Guided Learning Centre policies will apply for major projects that are overdue (see *Parent & Student Handbook*). Departmental policy for non-GLC assignments permits the submission of minor work until the work has been returned. School policy restricts assessment *for* and *as* learning to no more than 10% of the final grade.

Percentage of final grade:		Categories used to report final grade:
70%	10%	Practical Exercises
	10%	Tests
	10%	Simulations/Performance
	15%	Presentations
	25%	Assignments
30%	20%	Major Assignment
	10%	Final Summative Examination

Achievement Chart – Business Studies, Grades 9–12

Categories	50–59% (Level 1)	60–69% (Level 2)	70–79% (Level 3)	80–100% (Level 4)
Knowledge and Understanding <i>Subject-specific content acquired in each course (knowledge), and the comprehension of its meaning and significance (understanding)</i>				
	The student:			
Knowledge of content (e.g., facts, terms, definitions, procedures)	– demonstrates limited knowledge of content	– demonstrates some knowledge of content	– demonstrates considerable knowledge of content	– demonstrates thorough knowledge of content
Understanding of content (e.g., concepts, principles, theories, relationships, methodologies and/or technologies)	– demonstrates limited understanding of content	– demonstrates some understanding of content	– demonstrates considerable understanding of content	– demonstrates thorough understanding of content
Thinking <i>The use of critical and creative thinking skills and/or processes</i>				
	The student:			
Use of planning skills (e.g., focusing research, gathering information, selecting strategies, organizing a project)	– uses planning skills with limited effectiveness	– uses planning skills with some effectiveness	– uses planning skills with considerable effectiveness	– uses planning skills with a high degree of effectiveness
Use of processing skills (e.g., analysing, interpreting, assessing, reasoning, generating ideas, evaluating, integrating, synthesizing, seeking a variety of perspectives, forming conclusions)	– uses processing skills with limited effectiveness	– uses processing skills with some effectiveness	– uses processing skills with considerable effectiveness	– uses processing skills with a high degree of effectiveness
Use of critical/creative thinking processes (e.g., evaluation of business situations, problem solving, decision making, detecting bias, research)	– uses critical/creative thinking processes with limited effectiveness	– uses critical/creative thinking processes with some effectiveness	– uses critical/creative thinking processes with considerable effectiveness	– uses critical/creative thinking processes with a high degree of effectiveness

	The student:			
Communication for different audiences (e.g., peers, business clients, company supervisor) and purposes (e.g., to inform, to persuade) in oral, visual, and written forms, including electronic forms	– communicates for different audiences and purposes with limited effectiveness	– communicates for different audiences and purposes with some effectiveness	– communicates for different audiences and purposes with considerable effectiveness	– communicates for different audiences and purposes with a high degree of effectiveness
Use of conventions, vocabulary, and terminology of the discipline in oral, visual, and written forms, including electronic forms	– uses conventions, vocabulary, and terminology of the discipline with limited effectiveness	– uses conventions, vocabulary, and terminology of the discipline with some effectiveness	– uses conventions, vocabulary, and terminology of the discipline with considerable effectiveness	– uses conventions, vocabulary, and terminology of the discipline with a high degree of effectiveness

Application *The use of knowledge and skills to make connections within and between various contexts*

	The student:			
Application of knowledge and skills (e.g., concepts, procedures, processes, use of technology and materials) in familiar contexts	– applies knowledge and skills in familiar contexts with limited effectiveness	– applies knowledge and skills in familiar contexts with some effectiveness	– applies knowledge and skills in familiar contexts with considerable effectiveness	– applies knowledge and skills in familiar contexts with a high degree of effectiveness
Transfer of knowledge and skills (e.g., choice of tools and software, ethical standards, concepts, procedures, technologies) to new contexts	– transfers knowledge and skills to new contexts with limited effectiveness	– transfers knowledge and skills to new contexts with some effectiveness	– transfers knowledge and skills to new contexts with considerable effectiveness	– transfers knowledge and skills to new contexts with a high degree of effectiveness
Making connections within and between various contexts (e.g., connections between business studies and personal experiences, opportunities, social and global challenges and perspectives; cross-curricular and multidisciplinary connections)	– makes connections within and between various contexts with limited effectiveness	– makes connections within and between various contexts with some effectiveness	– makes connections within and between various contexts with considerable effectiveness	– makes connections within and between various contexts with a high degree of effectiveness

Note: A student whose achievement is below 50% at the end of a course will not obtain a credit for the course.

Considerations for Program Planning:	
Ontario elementary and secondary schools strive to support high-quality learning and student well-being. Schools give individual students the opportunity to learn in ways that are best suited to their individual strengths and needs. At the secondary level, students' ability to thrive academically and personally is also supported by their ability to choose courses and programs that best suit their skills, interests, and preferred postsecondary destinations. Educators plan teaching and learning in every subject and discipline so that the various needs of all students are addressed and so that students can see themselves reflected in classroom resources and activities. This section highlights the key strategies and policies that educators and school leaders consider as they plan effective and inclusive programs for all students. The areas of concern to all teachers include the following: • Student Well-Being and Mental Health • Instructional Approaches • Planning for Students with Special Education Needs • Planning for English Language Learners • Healthy Relationships • Human Rights, Equity, and Inclusive Education • The Role of the School Library • The Role of Information and Communications Technology • Education and Career/Life Planning • Experiential Learning • Pathways to a Specialist High Skills Major (SHSM) • Health and Safety • Ethics Considerations related to the areas listed above that have particular relevance for program planning for this course are noted here:	
<i>Student Well-Being and Mental Health</i>	Mental health and well-being touch all components of development. Mental health is much more than the absence of mental illness. Well-being depends not only on the absence of problems and risks but also on the presence of factors that contribute to healthy growth and development. By nurturing and supporting students' strengths and assets, educators help promote positive mental health and well-being in the classroom. At the same time, they can identify students who need additional support and connect them with the appropriate supports and services. What happens at school can have a significant influence on a student's overall well-being. With a broader awareness of mental health, educators can plan instructional strategies that contribute to a supportive classroom climate for learning in all subject areas, build awareness of mental health, and reduce stigma associated with mental illness. Taking students' well-being, including their mental health, into account when planning instructional approaches helps establish a strong foundation for learning and sets students up for success.

<i>Instructional Approaches:</i>	Students bring with them curiosity, individual abilities and interests, and a diverse set of personal and cultural experiences, all of which will impact their learning. Instructional practices and learning activities that draw on students' prior knowledge, capture their interest, and encourage meaningful practice both inside and outside the classroom will be used. Students engage in learning when they can see the connection between the concepts they are learning and their application in the world around them and in real-life situations. Lessons will include differentiation to address the diverse strengths and needs of each student. Common classroom strategies that support differentiated instruction include cooperative learning, project-based approaches, problem-based approaches, and explicit instruction.
<i>Planning for Students with Special Educational Needs</i>	In planning instruction, activities, and developing course materials, consideration will be given to take into account the strengths, needs, learning expectations, and accommodations identified in the student's IEP. The most appropriate methods and materials will be used whenever possible to help students to achieve the expectations as outlined in their IEP.
<i>Planning for English Language Learners:</i>	Responsibility for students' English-language development is shared by the classroom teacher and other school staff. Teachers must adapt the instructional program in order to facilitate the success of these students in their classrooms. Appropriate adaptations may include the use of a variety of instructional strategies, the use of a variety of learning resources (e.g. visual materials, simplified bilingual dictionaries), and the use of assessment accommodations.
<i>Healthy Relationships</i>	Every student is entitled to learn in a safe, caring environment, free from discrimination, violence, and harassment. Research has shown that students learn and achieve better in such environments. A safe and supportive social environment in a school is founded on healthy relationships – the relationships between students, between students and adults, and between adults. Healthy relationships are based on respect, caring, empathy, trust, and dignity, and thrive in an environment in which diversity is honoured and accepted. Healthy relationships do not tolerate abusive, controlling, violent, bullying/harassing, or other inappropriate behaviours. To experience themselves as valued and connected members of an inclusive social environment, students need to be involved in healthy relationships with their peers, educators, and other members of the school community.
<i>Human Rights, Equity, and Inclusive Education</i>	Teachers can give students a variety of opportunities to learn about diversity and diverse perspectives. By drawing attention to the contributions and perspectives of historically marginalized groups, and by creating opportunities for their experiences to be affirmed and valued, teachers can enable students from a wide range of backgrounds to see themselves reflected in the curriculum. It is essential that learning activities and materials used to support the curriculum reflect the diversity of Ontario

	society. In addition, teachers should differentiate instruction and assessment strategies to take into account the background and experiences, as well as the interests, aptitudes, and learning needs, of all students.
<i>The Role of the School Library:</i>	The school library program can help build and transform students' knowledge to support lifelong learning in our information- and knowledge-based society. The school library program supports student success across the curriculum by encouraging students to read widely, teaching them to examine and read many forms of text for understanding and enjoyment, and helping them improve their research skills and effectively use information gathered through research.
<i>The Role of Information and Communications Technology:</i>	The use of laptop technology has given students access to additional and powerful resources. In this course, computer assisted instruction through local software will be used, as well as 'flipped' classroom videos, and other on-line simulations/videos. Students use the functionality of their tablet computer to make annotations and complete activities in these books which are not only backed-up through our network but also made accessible to teachers to allow them to monitor student progress. Online quiz software is also used regularly to monitor the progress of students. These assessments for learning are conducted on a regular basis to determine comprehension of the material.
<i>Education and Career/Life Planning:</i>	The knowledge and skills that students acquire in this course are useful in preparation for a variety of fields in post-secondary education. References and postings are made throughout the course to illustrate the 'real world' nature of this course and what options exist for students interested in pursuing this subject.
<i>Experiential Learning:</i>	Planned learning experiences in the community, including job shadowing and job twinning, work experience, and cooperative education, provide students with opportunities to see the relevance of their classroom learning in a work setting, make connections between school and work, and explore a career of interest as they plan their pathway through secondary school and on to their post-secondary destination. In addition, through experiential learning, students develop the skills and work habits required in the workplace and acquire a direct understanding of employer and workplace expectations.
<i>Pathways to a Specialist High Skills Major (SHSM)</i>	The Specialist High Skills Major (SHSM) is a specialized, ministry-approved program that allows students in Grades 11 and 12 to focus their learning on a specific economic sector while meeting the requirements of the Ontario Secondary School Diploma (OSSD). The SHSM program assists students in their transition from secondary school to apprenticeship training, college, university, or the workplace. This program enables students to gain sector-specific skills and knowledge in engaging, career-related learning environments and to

	prepare in a focused way for graduation and postsecondary education, training, or employment. St. Andrew's College does not offer Specialist High Skills Majors.
<i>Health and Safety:</i>	Under the Education Act, teachers are required to ensure that all reasonable safety procedures are carried out in courses and activities for which they are responsible. Teachers should model safe practices at all times; communicate safety requirements to students in accordance with school board policies, Ministry of Education policies, and any applicable laws; and encourage students to assume responsibility for their own safety and the safety of others. Teachers follow school health and safety policies and procedures for in-class and experiential learning opportunities.
<i>Ethics</i>	The Ontario curriculum provides varied opportunities for students to learn about ethical issues and to explore the role of ethics in both public and personal decision making. During the inquiry process, students may need to make ethical judgments when evaluating evidence and positions on various issues, and when drawing their own conclusions about issues, developments, and events. It is crucial that teachers provide support and supervision to students throughout the inquiry process, ensuring that the students are aware of potential ethical concerns and address them in acceptable ways. If students are conducting surveys and/or interviews, teachers must supervise their activities to ensure that they respect the dignity, privacy, and confidentiality of their participants. Teachers should ensure that they thoroughly address the issue of plagiarism with students.
